Sand stone hole (18M) --
Why doesn't he say such things to my face
Sub Riches? Hoyle said Brian had said
wanted. At 8:30 we became working
through all of the huts + thought
that we were going to excavate all of
them!

B come up to me + explained why
in photos of me but of his + Chris in
the exhibition - Vic didn't know who
I was! -- Well I certainly
wouldn't have look managerial equal
the London meetings?
She said something about
when he agrees would be supervising
the exhibition as if I had agreed -
typical of her trying to ignore the
fact that I said it would be difficult.

Thursday London 3rd

She drives me to start in here
yellow van - meeting on
arrived
In London

SAT 5th

on

9

Sunday - Return on
take peaks me up at Bodmin
Park way -- huge puddle in
Front of station ~ has been running
throughout my absence

Monday 7th

Return to site

H39 - in run as water flow
through it floor followed slope of hill
flugs to rise floor above walls on
quite steep slope on house

Can't back Mike feels in wall fall out
(based on orientation of stones) wall
would have been quite high -

on back circuit adjacent to the Thanes
one g wall without infl - rubble?

House floor -- peat amongst
corn and over flugs still coming
out floor beneath (defined by bare g
interior rubble West g bank) +
pass including top of context 14 (flugs)
--- = top of developed west context 16
= floor

Said G

Monday even

Went across to Jenny Filley camp
Invited them to see the exhibit in that
I since it will soon disappear.
Jenny made such a fuss about us excavating
it, it seems strange that no interest is
shown in visiting it. Jenny lent
space weatherproof covers to excavation
- which seemed a fine act.

Patrick informed me that ~~Boudet~~
Wayne had never picked cliff up
for the exhibition as organize
by Barnes. So Cliff was stranded
all day at the camp site. Organize
that Ray would bring out the exhibition
on Saturday. Offered drink & wine
- Chris provocative about Mike

10
Says that he has deliberately
reconstructed H23 to remove
the impression of an entrance.
Given the dire weather conditions
under which it was back filled &
reconstructed I am just pleased
that it looks so good. Anyway,
for me those who executed
the structure have a "right"
to set back their own way as
long as it looks sympathetic to
its surroundings and gives a
"sense" of what was once there.

From front entrance area - I think
found in peat (- unit) two
days ago found on last day I was
there.

Ruin area in front of house - decide
to go for Neolithic extending down slope
to cross wall - will give quite a good
'natural' for the geomorphologists.
Spot heaps of turf currently left
undisturbed.

In front of house large stones
= esplanade - using a terrace line
of enormous flat stones one may
form the entrance step / portal.

Back of house line of stones
possibly out onto old land surface
- may merit a back "upper" terrace
of the sloping floor of house -
sloping floor affects views outside of
houses - also noted on 3g view outside
entrance porch - possible that a
great gap - i.e. no a wide entrance
for a view. Court may therefore be

112
two "falls" - one from
"terrace" wall and one from
back of house. The back of house fall
is unbracketed ^(down in slope) like an overlapping
back of cards falling. Some of the
flag stones step up towards the
back of the house - this poss -
shouldn't have a normative view of
"flat" house floors.

Gang wall BSD Southern settlement

Faings looking up slope towards
Annoth stone specifically chosen
also vertical upright with flat edges
inside - to make surface for covered
stone on top - fallen stones on
downslope side maybe covered stones
on top - rather a jag saw wall
few rubble stones inside -

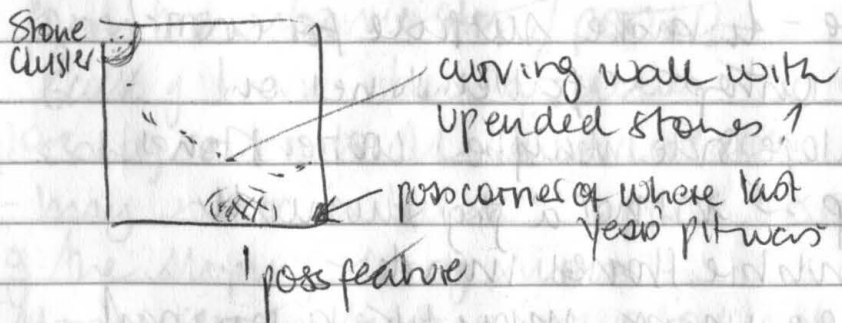

Image 1 mpr more like a rampart
or artificial boundary -
visual effect + symbolism important
certainly, some similar stones
but others being huge placed stone.

considerable labour investment
Mike will more idea of wall
boundary marking contour zone
of quartz visibility ~ if wall high
as appears, from downslope blocks
outview of quartz & settlement
Virtually no small rubble -
rubble = large stone - wall must
have been quite high based on
size of tumble.

NB charcoal samples taken from land
surface of house.

Tuesday 8th

Hul 39 Trench A 9th

Remember to think in terms of
curving walls -

Flint finds all from crevasses in
the stone cluster. One of flints from

a pebble lens which was removed.

Flint find was under peat has
has cross-cross cuts = metal cuts

walk onto moor with Patrick -
with Nigel ahead - walks through
landscape with speakers

Nigel has finally brought himself
waterproofs (yesterday at Boscawen)
clovelly clothing company . . .

Hi Penny visit! for lunch -
move to 28 - less windy 120 n/a
good lunch but

Hi get geomorphologists to look
at pattern of large earthen flat stone -
in front of house two either side of
positive entrance may be used
for post entrance postholes S -
also gaps in stone flagging
emerging - may be posthole
gaps - upended stones may
be packing postholes, thus

will be like

looks like collapse
is like a pack

13

Garry getting to top on upslope
side of wall - need to look for
phos etc here - Under leached
layer a silty layer - is this clay
silt redeposition from the ss leached
layer - This silty layer lies on top
of the ss - seems quite deep on
this side - Chris T interested in
digging on inside of the wall

← ~~low~~ coarse flows

Monday 14

x H1

Flags looking less flag like!
Crown wedge gone - ground surface
still high

* Crown only one stone deep
large chunk of quartz in
seal

Tony Blackman says pitch
for 8m wide house - 45%
if drop gully too far out would
need huge posts/poles
Blackman + "winkles"

Visit

Channel in H1

flints

H39 back

gully - quite some distance
from ho - quite deep
is for collection of water from ever
or upslope drain - filled with stones
+ deposit post ^{one} excavation - not
a sump.

Wall + BSD

Gang wall ~ stone over Post
get gang to draw in also edge
(ie bottom of excavation)

Set out LBE1

Laid out to take post track way
+ posthole for gate also to
cross breach / crown of ent. terminal
Gang thinks breach - will
exc half first to get section
of head over wall of first -
what it is

Tues 15

Site loc. -

H39 back curv wall - Chris idea must be earlier than 39 because would not consent of 39 -
Wall planned to make 39 -
Scattered nature of it better explained on edge of gully 2 possible places where roof / thatch supports come down thatch could stop short + water flow into gully / thatch could come down to ground level gully in hole house? - gully deep because quite high up in it otherwise over flow into house

Mike thinks Chris wall is a stone stripe,

H1 ① Curn outside could be result of two wall cells collapsing - wall would provide the two directions of stones perhaps lower cell first which forms upper cell / course

Tues 15

H1	R	H39
(Nigel)	Reinjure	Tess
4 Mayfield	Leanne	Tania
Gene	Rosalind	Katie
Luise		Simon
Penn		
Ky		
Loe		
Kate		
Gary		
Andrew		

Other ideas
Actually a piled-up curn which collapsed
③ One wall cell. directional collapse plus pile from (other) part of house

to collapse in a different direction.
Stone morn - three person job
Nigel Mike Mayfield of flags from floor - massive effort - wheel barrow to slow curn
Sitting up slope in trench - not marshy
= new point
Flag stone discussion going home with Mike last night - why some flags on top of other / ie overlapping -

possibilities - way of stepping
stones up hill slope - creates
more surface space than using
space. Dec putting of flags on
them for used working stones
... Chopping eh !!

Looking of other parts of the floor
& rejected ones just left on top of
them. Remains to be seen
whether the gaps are where
post went through.

Relationship between other bits of
internal wall in section + flags
flags fit neatly around it
+ about it. ie wall the flags
= wall. Flags also seem to go
around the wall maybe there
was a door! ... internal
hidden divisions ? ! !

Wall entrances

B wants one with quartz (moves when kicked)
Giving a diversion = on the surface
+ in the surface other large pieces
of quartz scattered around.
Best ground around quartz gives
the impression of an intern.
Also immed below surface ~~mass~~ stone
On site Wall ent which we are going
for more obvious question.

(ie a stone step (flat stones)
seems too high for a continuous
used track.

such as breaching - space for
tracks wall structure

Yesterday afternoon when B
was on site talked about book
Thinks that we ought to put our
name on the chapters - - -

interesting - why the shift
does tend to fragment the project
said that I wanted to write
about 1) process of engagement
being on hill x days
doing physical work - stone
moving, most personal relationship
with stones, bench humor,
firmness.

2) How to excavate on the moor.

3) Cross thinking how + why to
excavate - organic inter-relationship
between on site trench ideas,
Wider settlement / field systems
etc.

Day - morning - warm still
muggy - afternoon overcast
+ breeze

walking to site Mike pointed out
huf stand cut by least (nr
Charmans Westmoor gate) also
how Charmans house (16th c)
was built in a least cut.

I think the western settlement
was isolated from Brown Willy!
when came over hill down to least 1
look across Brown Willy - the
biggest upstanding whole stones
= points of orientation + points that
were walls orientated to tower

Coada has boulder stream river
below from 39 Coada looks
below Brown Willy for
beneath Brown Willy unknown
for.

Gary wall discussion

On west side of Trench - (at
Post pass land surface / alluvium
which included with silty stuff at
base outcrop of BA soil which had

limited clay soil horizon
diffuse capping / deposition
through to rob.
What is the silty mat at
base of column seq.

could be animal puddle around
wall/nest entrance with silty
water & seawater -
could be puddles around exit/foot
stones, could be wheel/
plough marks around the contours

Thoughts on ~~22~~ - 23 -
if back stone in sil - then
too steep for Roof

BB arrives - wants benches to
verify wall narratives...
asks why haven't chosen entrance
with quartz by side - point out that
quartz is on surface (it moves)
Mike comes over waiting for
me to drive back

BB next day says he hovered -
See chimney to check on shell
~~Drink whiskey~~ - evening meal
Wednesday 16th in B+Penni's caravan
with Roy & Gary.

20

can hardly remember the dragging
thoughts for this day -
Started phosphate analysis on
H1 went for fun area -
Took samples from back on
house interior from under
rubble (back wall?) in H1
from under internal wall - Andrew Poole
took these samples -
While doing this Ben -
approached - went up slope →
Sat on large rock floods of tears
about feeling useless - how fast
I had been obstructive to her wall
narrative, sharing information etc.
Cliff arrives back with a glint in his eyes
Thursday 17th (appears at caravan in the evening)
H1 idea about ^{small} stones round the
edge being a large lump?
Day of evening meal wine + multiple dishes

Green entrance not over 80
 - short no short at present
 see chimney to check
 room, entrance - (see notes)

can remember this day -
 very busy all day. Taken drawing
 in Richards Trench A -
 Eleanor set up.

Cliff set up drawing in chas trench
 New entrance trench opened up

for 99 + LBS

LBE 99 B - up in Southern set
 wall which runs into 89 -
 massive wall - go for an
 area excavating part of the
 entrance - choice of a more massive
 wall to compare with apertures
 in the western settlement

Sunny day everyone in a good mood

Simon's last day

Cliff goes - white walk between
 trenches declares that he & are
 in a relationship

Day off 18 June 99

Wonderful sunny day washing
 in morning - ~~Sept +~~ Bacon breakfast
 for Mike & Chris - looked by Chris

2pm -> trip to Carnwath - w entrance
 no different - houses along slopes
 ones with back sunrises.

At least 4 settlements, solution hollows
 in rock at top Dorothy Dudley trenches
 clear - test pit + one with backfill
 across it remaining + not backfill

maybe a route thru these houses
 via the old excav - letter when get
 back, from B

go + see Henry in evening filled
 with enthusiasm for gas row -

Bm B letter (about the tear mostly)
 and Henry's conversation about
 letter from Cornish Heritage Trust
 to Dave Hadley indicating that up
 should be stopped from digging
 ~ apparently Dave Hadley supportive
 + indicated CHT were talists!

15
Nigel leaves tomorrow -
delivered 2 bottles of champagne
to Mike + myself - huge generous
Roland Oswald turned up at
Oswald subsequently - she wants
to leave - really hates the hill.
Hands with long ~~short~~ red-painted
nails - perhaps she left because
she broke a nail (like joke!)
Go round to Nigel car to
see if she can leave with him
tomorrow morning - + arrange
this. Travel across to her -
I realise that the geomorphologists
have arrived - walk around
trying to locate Oswald's bed (or
them) - put markers together
- Ed in Pennu Oswald
Steph north Cliff + Angus

22
Looking back - sitting on rock
BBH# conversal - realise B + me
doing opposite things
Me - from trenches terrain form
+ interpret Muffled whole at the surface
B ~ Creates story from the
muffled and verifies it with the trenches.
19
Back at work Pennu last digging
wake up to rain on the canvas ^{on eye} ~~not~~
feel twice as tired as before day off
wind + rain intermittently through
day ~ some gifts (Mike + Tony) +
geomorphologist on the hill. Try
to get them to go for a ground network
from the hill being born - then
add the dimension of the hill dying -
... going back to vapour + h
take three hours - across H1, H39,
H71 to narrative the hill
Prophets taken outside Front 7
B H1 ... not enough maps

on site for 39 - get them to
leave sample pillar.
In both - will sample the Mor humus
at one sample + the soil surface
below as the second sample,
since the Mor humus = the
surface that the peat sealed when
is post the abandonment of the
BA landscape. The soil horizon
is taken to be the transformed
BA soil. Therefore both taken
as part of the considerations.

Geomorphs think hill glacial
Brown Willy glaciated -
He sits on hill therefore leave
no marks - why more
to clutter at Leshkernick -
Maybe more water - will look
for + mark out the boggy spots
tomorrow - - Scars boggy spots
today even in post bronze Age

23
peat will relate to water charged
circles of the past because water flows
based on submerged jointing

LBE99 A - still seems to have some
structure ~
LBE99 B Also structure.

columns/islands left for phosphate
analysis on LSS99 H39 Trench B

Don arrives evening Pick up
Gareth after work - get supplies
from supermarkets ~ or is Intarion but
Gareth not at Bodmin Parkway -
go in direction of bus station in case
got it wrong! ^{no} Arrived ^{the Caravan - curse} h.
As arrived on site ~ Green shorts white
legs, hat ~ + bags of sweets
for everyone ...
Arrive back caravan after not finding
Gareth - Tony in caravan with Chris
leaves Old Chris informs gun
belt coffee pot stand has been photographed

20th June Sunday

of state on table. M explodes at what he considers to be a gross infringement. No doubt Honey will get it all wrong ~ No state is mine + the coffee pot stone is a present for Boston which Mike has patiently reconstructed. Go over to Chris Penny caravan to check geomorphs ok + sort out fact Patrick has arrived at caravan door with no room. The one he was occupying being officially reoccupied. No luck with Chris because Cynthia is now here.

Rain through night sounds miserable outside. When actually emerge from caravan warmish breezy feel more optimistic. Say goodbye to Penni & Eleanor who are gathered with the others outside the caravan at our official morning gathering spot.

On site. Hut

Flintstones being removed. Clinging of waste thus generated. Waste Stone to have for testing w/ phosphate analysis beneath. Talk about clean loose straight into hand shovel + checking for finds. Cleaner on site - don't dig good across to great a distance. Tell Richard + Chris to keep all quartz - poss clippings to function as flint. 2 Hammer Stone - with battered ends found at fragment level one clay quartz haven't yet seen the others.

Stonewrapping commenced

Two stones (one excavated
(The excavated one) on frame
each side of the perimeter around the
dug-out one.

LBE99A Still has structure -

Duc + Andrew taking turf
peat off - will then plan / photograph.

LBE99B Dry + motion -

Still taking turf peat off - doesn't
look as structured

LSS99 Trench A Cliff still drawn

Section

LSS99 Trench B

geomorph take measurements

site which has stones when doing pen-
glacial Stone Stripe discussion.

#

Phosphate and new technique
leaving pedestalled scumblers in
LSS99 Trench B

8 to 10 AS stratigraphic contours -

Can test in peat + mor humus + below
thus get both horizontal + vertical testing
for phosphate

House I

will do phosphate analysis
under lifted flags to day -

Think that we have an internal annex
either side of the entrance and
One entrance

Discovers of stone wrapped tree
~~Monday~~ Yellow circle red stone

in middle yellow stones surround
tree - Charming, beautiful

Mike says tree perfect without stone
wrapped

See Chris (+ Ash) in using
sun in evening. Talk about

Project wrapped stones garnish
sh. Crystals + Shells there as
well. Rib appears about deflection
to Anthropology - Lesin - Mike
mentions the travel incident a
bit long to bring him back!
Return to seven Chris has already
cooked, expecting us to have had
a drink at the night bar . . .

Monday 21st June

Solstice evening
did not write up this day yet
involved in taking phosphates under
flag stones in House 1. New arrivals
Don Cooper, Aaron Stowell, Conner
McLilly, Tom Pin told Shawn
around given site narrative.

Tom has a balerclava or
with penguin eye + moth
peephole - works well in wind -
but the ~~at~~ for the night would make
an IRA field day of it . . . it is just that

The best outdoor clothes are chosen alike
by archaeologists, and army people
doesn't mean communality of outlook

Wonderful sunny day. Chris has returned
to leave walls in his hands to
familiarise himself with the new
trenches which have been dug while
he was away having a very short break
in St Aust.

St B arrives at post tea time -
leave off phosphate analysis + walk the
excavations with her. The walls
are beginning to focus both LBE 99-A
+ LBE 99-B are beginning to look
structured ie like in situ as hoped

LBE 99 B has a clear right angle
turn inwards in front - ie on
outside side of entrance hand size
stones have been placed -
to know site study hits etc -
Fantastic about what it is

Wall talk with B. Stokes
reversed our idea of stones against
walls to facilitate animal movement
over walls to stones against walls
to stone animals moving over!

Evening make site perfect for
yes so the visitors - leave

by Bowthorpe route (with Richard,
who has irritatingly hung around it)
While Mike + I try to discuss excavation

strategies - Lag back as they walk
along the moor so I can have some space
to think

Evening calm many have
eaten in evening sun in ord,
to go back on moor for 50ish

Mike + I return to the calm of the
Cannover

Bed 12.30 - as always!

Thorn leg - high more about
leg being bigger than other
~ next morning get Mike to check
my leg size!

End of Altamoor venue
Kilnhampton wine +
Cheese

Thurs 22nd Nov

9 excavation days to go!

Take ~~new~~ everyone on the trench tour

Comments/ideas - Cliff - need

green beyond entrances to attract

animals in

What are the entrances leading into?

~ reviews, directionality

LBF 99 B is orientated inward on

a view of the Fowey

H39 - Christ comment = a Infill -

horse behind fence to allow for a

deep gully or passage between the two

horses once eyes etc in place

poses poses question how does

chronology of the fields cope with the

chronology of the horses

Richard out yet more bazzing

After break disappears over hill

with Jane's mobile phone + is

not back (ie leaving his trench)

for at least 12am hr

Start phosphate sampling in
 3 LSS 99 Trench B -
 Decide to sample peat,
 Mor humus & pre mor humus
 And at each sample point

Bark's Exhibition work shop in
 evening - arrive covered in mud
 Messy hair and very tired
 Rows of chairs commonly used
 up - Quite a good turn out of locals
 & says they want some 'talk'
 about our work - so end up
 giving unprompted 'lecture' w
 Chris -

[B was subsequently next day
 lost drink white wine &
 Diogenes red] Mess cheerfully
 goes off saying he has to see
 a bereaved family - Jaenny!
 Chris declare that they've been
 given tomato juice, and milk

into solution hollows on tor tops - -

23rd

Wednesday Am out at this inside about bag
 Angus within today having taken a day off
 Rising start - hear it on car radio roof
 Ride to ~~Brown Worthy~~ across Davidston
 Airfield summary - Can't see brown
 Worthy or Rough Tor - all misty
 Go Bowthick rock with three
 in back of van - Back fill seal of
 Horse 1 Trench A with Chit 8th drawing
 the section unit. But large stones included
 some flag stones in it - - - feet of strength
 by ^{stone} Aaron Tom Arnold & Gareth Spier
 Trowell back of Horse one surface (now flag
 are removed) seek poss features esp
 in fence area rotated last night

Jeremy joins us at lunchtime with
 great pouches (green) which make
 him look as if he's got but he's old &
 on work. Take pollen samples from
 level surface under wall of horse 1
 & from level surface under the tomb of

of wall of house 1

for area - 3 poss features -
all under flagstone area + possibly / ^{absolutely}
either than house 1. One posthole
open under the wall (Mike hears it) +
Mike found pottery in it yesterday -
another is burrow indented & just
under flagging. Also under flagging
a scoopful of linear dimension
is this like Dartmoor - pre-1900 post-
hole phases. 2 features to understand
by which to take samples -

The posthole under the wall (and
emerge with the horse front) has
no chance to sample

Hammer stone found by Anon in

House 1 today - looks like round
of flint, but not yet washed

Richard French LSW 99c

Motoring Bievering going through
upper part of corrupted 12b -
finds still coming up (mainly in

Staves - slate with marks, quarts +
worked flint

It is an annex or an enclosure
the side of H1

House 1 view - dead opposite Brown
Willy - by doing a week in the life
of Brown Willy shot

A book has been run for the first person
to find a piece of pottery in trench A -
House 1 the money was contributed
yesterday ~ (£1 per person) today Gareth
found some pottery! Gareth has a
good eye & is finding a higher horse
finds than others. I told him that he was
~~so~~ skewing our database!

Richard Mc arrived by time of our
return 7pm. Made food - chatted
until 10pm ~ Richard went off
to Lion Inn where staying for the night

Mike plus Smith finds ^{for H1} in even
all in places without flags or in crevasses
between the flags - suggests things are
in situ

Thursday 21 June

Wonderful sunny day
Brown Willy. Rough for eh fully
insight as we travel across
Dundrum aerfield. The Barwood -
Katie Rosie last day - meet
Go Bow truck route - meet Richard
walk on site which is a mix

~ Richard on soil. Acid Brown
earth in Bronze Age ~ not
a true podzol development
during Bronze Age would have
been viable with manure
~ fields both for crops & animals?
acid brown earth could have supported
oak trees. Notes that iron pan
patchy in house 1 trenches
+ elsewhere - not true podzol
but still in stone row area

30

talks about Hexworth series

Offers to do a box monolith

Suggests phosphate from drip trenching
House 100.

B 199BFA - - ie western entrance
one confirms colluvium - says
thinks colluvium is prehistoric + probably
the result of animal trample + dislodgement
of clods ~ no real hor. humus
confirms distressed / disturbed soil surface

LSW99 House 1 trench B

At back suggests that the gully humus / peat
is result of colluvium / as peat build
up ~ has granite pieces

Wind blown in from western rocks
/ disturbed surfaces

Gray: 199BFA - need to begin
to dismantle. Idea of trench up
slope ~~great~~ + then pile on entrance
- ie is an entrance gap - no more
can be done in plan. Need to start
dismantling stones

199 BSB

Wines from natural

Gary imagines post hole at end -
gap in wines - too long + at
wrong place - Decide on a strategy
of taking down either side of
trench getting trench leaving a
unexcavated strip in the middle
not way get a double section across
the entrance gap + a double section
across wall

Take ~~three~~ phosphates from
Kingfisher Trench A House 39.

evening dinner / champagne
with Cliff
Buy at 200w

Washing, working up, phone calls
Trip to Port Isaac + Rumps in afternoon
Dinner buying, glass work
Lying out on grass with head
Arked down - Rumps my son
note between two holes after
type bank

31

on to rock outcrops - Balesit - bushes
greenstone outcrops

26th Nov Saturday lovely sunny
short wind growing through morning
Gary - 199 BSB - spent all over the place
sheep / cattle have got at it - 199 BSB
back to the original breached storey
with the wall line better defined

Chris 199 LSS99 - trench B finally a
shed of pottery - LSS99 trench - A
her clearing to locate postholes

Rienas trench (c) mottled in g reb
loss for final time 1 final flake
piece quartz still came out

Marions wall 199 BSE

Very interesting ash dep on top (but
siltier than when in situ - small
stones from natural -
the shaft that is imbricated -
the last has probably
cut the iron pan

Ride on a trench journey
photographic record with for
a journey through walls -
along fields etc -

- ① A journey to House 1
- ② A journey to 23

Lunch looker is quietly
closing down - we are all tired
we sleep - - - Sunome - - - B red

After quiet with a group of people
moving tea - Miss closing in 1
Wind post lunch - sitting at
Trench A LSS 99 Aunt see brown

Billy - -

go down to Mainons - - -

Wall then test cost either side - -

top material mustering pest +
natural stones need to get set/ straight
taken to surface with a bulg
then will get sand surface
which was of last pile - this surface

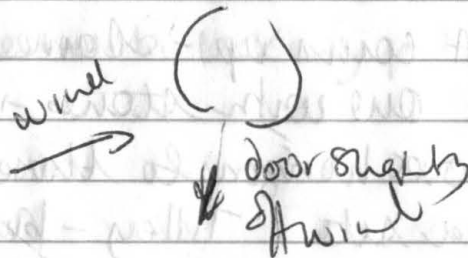

on which wall built - -

can cross - compare to Matlyn's
test section -

Does H39 entrance have to
avoid the stone -

is H39 in full top of H39
trench - rubble from H39 wall

Harsh windy part of hill
wind blows up from lower valley
door faces wind

Dist bet 39 + 38 at back import
to pit in rock -

The arrives - - in middle of
dinner - - phone call - returns
with drink -

55
Sunday June 27th

Rained from 3pm in the morning

MA's arrive (visita) -

leave en route to site -

Very slow driver -

can't hang around wait

site must continue 20 people
waiting

H1 is damp enough to track

chase postholes -

they start come up - some rabbit

damage one with stones -

one/ken over horizon to house 1

show round site. Tilley - blue

heap next field F1 - lured

up sleeping. Says worn out

spent previous day looking after him

eh ... how he has been hanging

in a village hall throughout

One seems optimistic about
phosphates. At site sample

taken from west of cove
and from top of Lestonier hill,
20 paces down from the cove.

J & S paper accepted - message
from Marilyn with more film &
permanent marks

can't remember afternoon
properly - One draws rapid sketch
on House 1 features -

Mike Leasure excavates looking pit
type feature

Monday

Written after event -- many
have forgotten details --
Rising many park westmoor gate
to ask chormans about 4-wheel
drive get invited out to dinner
on Wednesday

MA's arrive just as leaving - tell to
jump in car & follow us --
get behind (good views en route across
Durdston Airfield) -
get lost past Starnum double back
to find them can't, go on side ...

Trainer A

Connor back fills entire bench House 39
Single handed for weeks this Sunday
Connor had eye problems

Bonshays at car wash to save
Jumps cos has ~~any~~ ankle pain
When get back to Westmoor gate
offer photos of looking in for
Piles go into chormans to

strange 4-wheel drive -- window wipers destroyed
mangled - go to non sun - Mike says can't stay

Yes someone there has already done the wipers

34

Jump intermittent sun
Soft Irish sun warm

Mike .. break down -

Ulogical phos - searching sb
Stake holes appear in

afternoon

Walking back in evening - Mike ..

have you something I can breast ...

finally lies on back on moor - kicks his
legs in the air! One comes over
in evening ... Cropp come ...

Learn for 'hous' wish prior to leaving
walk off Bowthick route --

Look out on Lester mikes landscape
Feel as if I will be leaving home soon
Never again will I live here --

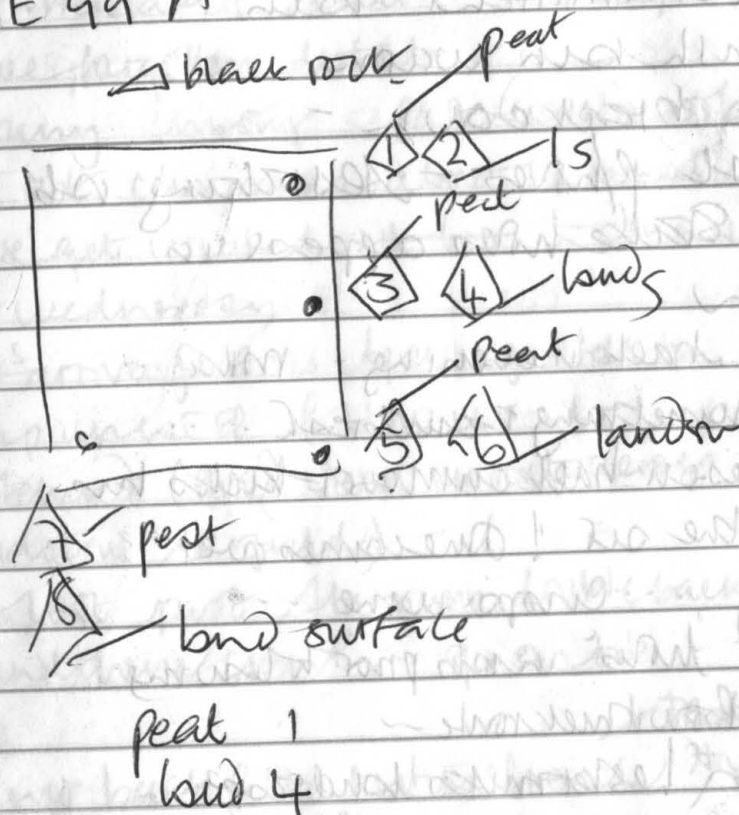

I will just be a visitor

House I view to Brown wily &

Valley truly special

Shadows run across hill truly special

Wed
Phosphates
BE 99 A

Wednesday

Today is different wind, hot sun,
winning done. Trenches are being closed -
do the last things - pollen from BE 99 A
and phosphates from B Phosphates
also taken by Tom's from

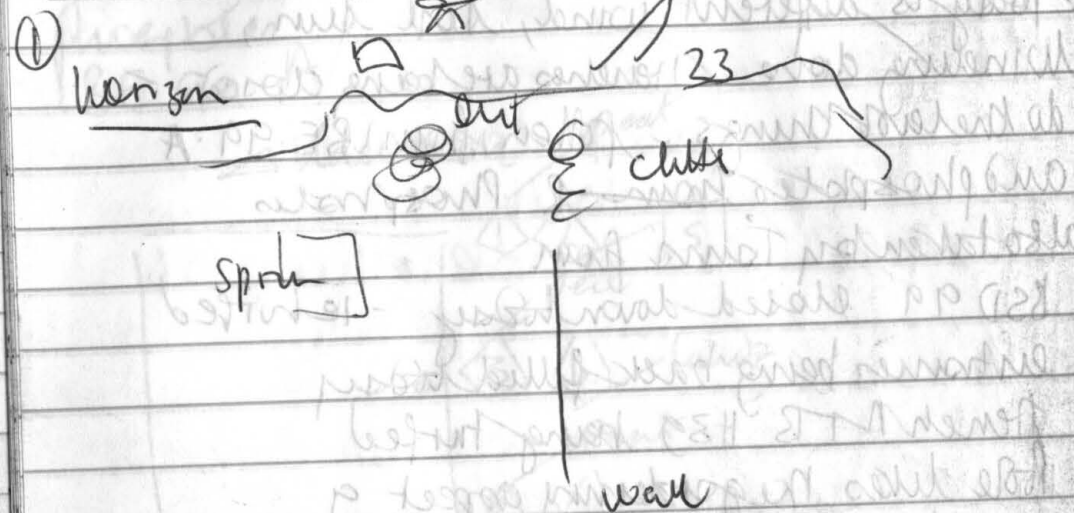

BSD 99 closed down today - 1e turfed
entrances being back filled today
Trench A + B H39 being turfed
hole like the gardening aspect of
it ~ patchwork turfing

House I stress levels down - have
instocked with the pb jet further
2 stake hrs have appeared + another
2 post holes from outer ring

Also a scoop feature at the back of the
house with a large chunk of pb in it

Afternoon did wall/entrance narrow
with for. Approached site from codd
ent - sequential into wall entrance
focusing on the blip of 23+20

Word of Springs narrative

②

③

human

④ for smoke & wail

⑤ 23

⑥ 2 spring + wail
See query

⑦ word Sembr

At Ave 1 finally strike holes,
cutting sherd of pottery from fresh
Scrap at back of wall -
Vstie mollocking in wedding case
wedge beds... corner +

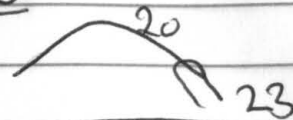

Walk to Western entrance + 23

37

① Ford up slope view

miniwork in
quilt

big 23
+20

people as well as rocks on skyline

clinging in front of mini quilt outside

Wall = enclosure?

sp. sheep in middle of spring

②

no + Ballina wall no wall

hesterback but today I

am in trap. Super of h

place Super of h

ring my food, Super of

dark wounded body, Super

of frustration, Super

the most of amazing being

Super of living here

from leaving home

Large p. albiventer in grassy gl.

25

July 2nd 1999

The last day ~ some in mist
work in mist on HI refueling
~ no view of Brown Willy until
lunch time

~~Q1~~ Qwert . . . 3p m

Cirno + Balbano will no nks

heskernick ... but today I
am in tear ... 5 year of tin
place 5 year of top + hill that
ring my word, 5 year of
bad wounded body, 5 year
of frustration, 5 year of

the most amazing beauty
I've ever living here -
I am leaving home
